Profile

Full Stack Software Engineer with 5 years of experience specializing in Java/Spring and React. I have a background building secure, scalable systems for large government institutions, handling complex business logic and high data volumes. I'm committed to writing clean, maintainable code that aligns technical performance with clear business goals.

EXPERIENCE

ASEE (Asseco South Eastern Europe)

Software Engineer

31/08/2020 – Present
North Macedonia

- **Ministry of Defense:** Implemented a complex HR system featuring Single Sign-On (Keycloak) integration, automated reporting, and comprehensive employee record management.
- **State Customs Office (Project ITE):** Developed new features and maintained mission-critical Integrated Tariff Environment systems.
- **Ministry of Internal Affairs:** Developed new features and maintained secure People and Weapons Records Systems.
- **Leadership & Internal Systems:** Maintained the internal company HR system and served as a **Technical Lecturer** for student internships, mentoring on Java and Spring.

ASEE (Asseco South Eastern Europe)
